

Studio Front Loading Kilns

Our Top Loading Kilns are built from high-quality materials that will last for years. We offer an extensive range, suitable for all users – from hobbyists to professional artists, and studios.

Main Features:

- Constructed from high quality, imported insulation materials (bricks and fiber blanket).
- Fitted on a steel frame for base support and finished in a stainless steel casing.
- The lid is fitted with a lift-stay to hold the lid open.
- A bung is fitted in the lid for improved moisture release from the heating chamber.
- Our elements are made from Kanthal A1 wire (or equivalent), and are designed to fit snugly into precision cut grooves to reduce possible damage.
- All kilns are fitted with a standard K-Type thermocouple. Other types of thermocouples are available on request.
- All kilns are fitted with the VT-36 fully programmable controller as a standard. This controller enables you to easily manage your kiln and can hold up to 36 programs.
- The maximum recommended operating temperature is 1300°C.

Optional Extras:

Fit your kiln with wheels for more mobility.
